CONTENTS OF VOLUME 53, 1994

(All rights reserved)

	PAGES
Keynote Lectures *(Symposium Proceedings: 12–15 July, 1993)*	
The application of nutritional science to clinical practice. *M. Elia*	1–14
Differences between cats and dogs: a nutritional view. *Veronique Legrand-Defretin*	15–24
Nutritional Epidemiology *(Symposium Proceedings: 12–15 July 1993)*	
Dietary fat and risk of breast and colon cancer. *Walter C. Willett*	25–26
Measuring nutritional exposures including biomarkers. *Pieter van 't Veer*	27–35
Measurement error: effects and remedies in nutritional epidemiology. *David Clayton*	37–42
Linking the field to the laboratory in nutrition research. *Barrie M. Margetts*	43–52
Antioxidants *(Symposium Proceedings: 12–15 July 1993)*	
Can dietary micronutrients influence tissue antioxidant capacity? *Malcolm J. Jackson*	53–57
Epidemiology and the role of antioxidants in preventing coronary heart disease: a brief overview. *Rudolph A. Riemersma*	59–65
Micronutrients and oxidative stress in the aetiology of cancer. *Andrew Collins, Susan Duthie & Marion Ross*	67–75
Carotenoids: functions and fallacies. *David I. Thurnham*	77–87
Reproduction and Fertility *(Symposium Proceedings: 12–15 July 1993)*	
The role of nutrition and photoperiod in the timing of puberty. *Clare L. Adam & John J. Robinson*	89–102
Relationships between nutrition, puberty and mammary development in cattle. *Kris Sejrsen*	103–111
The right weight: body fat, menarche and fertility. *Rose E. Frisch*	113–129
Nutritional Aspects of Recovery from Severe Illness and Surgery *(Symposium Proceedings: 12–15 July 1993)*	
Development of food aversions during illness. *Ilene L. Bernstein*	131–137
Appetite and nutrition in relation to human immunodeficiency virus (HIV) infection and acquired immunodeficiency virus syndrome (AIDS). *Carolyn Summerbell*	139–150
Does disorder of gastrointestinal motility affect food intake in the post-surgical patient? *T. E. Bowling*	151–157
Cytokine changes in the postoperative period. *Alan Shenkin*	159–167

Nutrition and Activity *(Symposium Proceedings: 12–15 July 1993)*

Nutritional implications of work in draught animals. *R. Anne Pearson & Jeroen T. Dijkman* 169–179
Nutritional aspects of endurance exercise in humans. *R. J. Maughan* 181–188
Diet and exercise performance in the horse. *David L. Frape* 189–206
Energy expenditure and physical activity in relation to fitness in children. *M. B. E. Livingstone* 207–221
Physical activity, protein metabolism and protein requirements. *D. Joe Millward, Joanna L. Bowtell, Paul Pacy & Michael J. Rennie* 223–240
Physical activity, undernutrition and child development. *J. M. Meeks Gardner & S. M. Grantham-McGregor* 241–248

ICONS Workshop Report *(Symposium Proceedings: 12–15 July 1993)*

Nutrition information and support for overseas members. *Ann Burgess* 249–250

Antioxidants *(Symposium Proceedings: 12–15 July 1993)*

Vitamin E: molecular and biological function. *Graham W. Burton* 251–262

The Role of Meat in the Human Diet *(Symposium Proceedings: 8–10 September 1993)*

Meat and right: the ethical dilemma. *A. J. F. Webster* 263–270
Social aspects of meat eating. *Nick Fiddes* 271–280
UK consumer perceptions of meat. *N. J. Richardson* 281–287
Vitamin E and meat quality. *Patrick A. Morrissey, Denis J. Buckley, P. J. A. Sheehy & F. J. Monahan* 289–295
Nutritional implications of a meatless diet. *T. A. B. Sanders & Sheela Reddy* 297–307
Microbial hazards in animal products. *Robert H. Madden* 309–316
Nutritional and other implications of irradiating meat. *M. H. Stevenson* 317–325
The role of nutrients in meat flavour formation. *Linda J. Farmer* 327–333

Application of Stable Isotopes to Nutritional Metabolism *(Symposium Proceedings: 2 November 1993)*

Nuclear magnetic resonance spectroscopy as a tool to study carbohydrate metabolism. *Peter G. Morris, Dominick J. O. McIntyre, Ron Coxon, Herman S. Bachelard, K. Tim Moriarty, Paul L. Greenhaff & Ian A. Macdonald* 335–343
The use of uniformly labelled substrates and mass isotopomer analysis to study intermediary metabolism. *Heiner K. Berthold, Linda J. Wykes, Farook Jahoor, Peter D. Klein & Peter J. Reeds* 345–354
The use of stable isotopes and mass spectrometry in studying lipid metabolism. *Michel Beylot* 355–362
Mass spectrometric analysis of stable-isotope-labelled amino acid tracers. *Tom Preston & Christine Slater* 363–372

The Sir David Cuthbertson Medal Lecture *(Symposium Proceedings: 30 November–2 December 1993)*

Clinical problems of a short bowel and their treatment. *J. M. D. Nightingale* 373–391

CMNSG Guest Lecture *(Symposium Proceedings: 30 November–2 December 1993)*

Interleukin-1, interleukin-1 receptor, and interleukin-1 receptor antagonist. *N. Joseph Espat, Michael A. Rogy, Edward M. Copeland & Lyle L. Moldawer* 393–400

Nutrition of the Brain *(Symposium Proceedings: 27 January 1994)*

Nutrition of the brain: macronutrient supply. *Stephanie A. Amiel* 401–405
Regulation of nutrient supply: the brain and appetite control. *J. E. Blundell & J. C. G. Halford* 407–418
Dietary effects on tyrosine availability and catecholamine synthesis in the central nervous system: possible relevance to the control of protein intake. *John D. Fernstrom & Madelyn H. Fernstrom* 419–429
Nutrient and toxin interactions in neurodegenerative disease. *Peter H. Evans* 431–442
Nutrition and mental performance. *Peter J. Rogers & Helen M. Lloyd* 443–456

Application of Stable Isotopes to Nutritional Metabolism *(Symposium Proceedings: 2 November 1993)*

Peptide utilization by tissues: current status and applications of stable isotope procedures. *F. R. Colette Backwell* 457–464

Moving Points in Clinical Nutrition *(Symposium Proceedings: 18 February 1994)*

Access methods in nutritional support. *Brendan J. Moran* 465–471
Nutritional support via percutaneous endoscopic gastrostomy. *Fionnuala M. Doyle & Nicholas P. Kennedy* 473–482

Seasonality *(Symposium Proceedings: 7/8 April 1994)*

Control of seasonality by melatonin. *Peter J. Morgan & Julian G. Mercer* 483–493
Photoperiod and the regulation of annual and circannual cycles of food intake. *A. S. I. Loudon* 495–507
Seasonal changes in growth and energy status in the Third World. *Andrew M. Prentice & Timothy J. Cole* 509–519
Seasonal changes in body mass, body composition and food requirements in wild migratory birds. *Ian Scott, P. Ian Mitchell & Peter R. Evans* 521–531
Seasonal variation in vitamin D. *J. D. Maxwell* 533–543
Seasonal infections and nutritional status. *Neville F. Suttle* 545–555

Newer Aspects of Micronutrients *(Symposium Proceedings: 22–24 June 1994)*

β-Carotene, are we misreading the signals in risk groups? Some analogies with vitamin C. *David I. Thurnham* 557–569

Newer aspects of micronutrients in chronic disease: vitamin E. *P. A. Morrissey, P. B. Quinn & P. J. A. Sheehy* 571–582
Newer aspects of micronutrients in chronic disease: copper. *J. J. Strain* 583–598
Iron, magnesium and ischaemic heart disease. *Peter C. Elwood* 599–603
Micronutrients and cancer aetiology: the epidemiological evidence. *Timothy Key* 605–614
New metabolic roles for selenium. *John R. Arthur & Geoffrey J. Beckett* 615–624
Novel functions of vitamin B_6. *David A. Bender* 625–630
The role of folate in the prevention of neural-tube defects. *John Scott, Peadar Kirke, Anne Molloy, Leslie Daly & Donald Weir* 631–636

ABSTRACTS OF COMMUNICATIONS

12–15 July 1993

Energy balance and physical activity in primary school children. *J. A. Payne, A. C. Payne & N. R. Belton* 2A
Breakfast trends emerging from the Irish National Nutrition Survey. *J. Sommerville & M. O'Regan* 3A
Assessment of haematological status in early pregnancy. *E. A. Cahill, S. F. Daly, P. M. Mathias & M. J. Turner* 4A

8–10 September 1993

Type A behaviour and diet. *M. E. Barker, K. A. Thompson & S. I. McClean* 6A
Dietary changes in a nationally-representative sample of Irish adults. *M. Kearney, A. Kelly & M. J. Gibney* 7A
An approach to the formulation of healthy eating advice. *M. A. T. Flynn, M. B. Codd, D. D. Sugrue & M. J. Gibney* 8A
Perception of food allergy in children aged under 4 years. *I. Kilgallen & M. J. Gibney* 9A
The effect of a beta-agonist (clenbuterol) on heat production of beef heifers. *E. F. Unsworth, C. T. Elliott, W. J. McCaughey & R. S. Park* 10A
Chronological change in serum insulin-like growth factor 1 concentrations and the relationship to growth in unweaned male, castrate male and female lambs sired by Texel or Suffolk ram. *A. R. G. Wylie & D. M. B. Chestnutt* 11A
Uptake of α-tocopherol in porcine plasma, muscle and adipose tissue. *H. Sisk, M. Molloy, P. A. Morrissey & D. J. Buckley* 12A
Effect of dietary oil quality and α-tocopherol supplementation on the oxidative stability of broiler tissues. *K. Galvin, P. A. Morrissey & D. J. Buckley* 13A
Manipulation of the polyunsaturated fatty acid content of pig meat in conformity with dietary guidelines. *C. O. Leskanich, R. C. Noble & C. A. Morgan* 14A
Effect of copper and/or vitamin E deficiency on DNA damage in heart and aorta cells of hamsters fed on fish oil or maize oil. *E. Turley, V. J. McKelvey-Martin & J. J. Strain* 15A
Protective effects of β-carotene and astaxanthin against oxidative stress *in vitro*. *S. M. Lawlor & N. M. O'Brien* 16A

Tocopherol content, fatty acid composition and oxidation products in copper-mediated low-density lipoprotein oxidation. *B. Corridan & M. J. Gibney* 17A
Effect of lutein on oxidation of low-density lipoproteins (LDL) *in vitro*. *M. Chopra & D. I. Thurnham* 18A
Relationships between blood antioxidant enzyme activities and measures of oxygen consumption in children and adolescents. *Caroline G. Egerton, M. Barbara E. Livingstone, P. G. McKenna & J. J. Strain* 19A
Effects of feeding high-fat diets and subsequent starvation on catalase (*EC* 1.11.1.6) activity in rat muscle. *J. M. Vaughan, S. Murphy & N. M. O'Brien* 20A
Fibre and antioxidant vitamin intakes of women in relation to recommendations for dietary sugars. *C. Bolton-Smith* 21A
The effects of amino acids on iron and zinc dialysability *in vitro*. *T. Bennett, C. Kehoe & A. Flynn* 22A
Effect of dietary calcium on calcium absorption from a purified diet in the rat. *K. Cashman & A. Flynn* 23A
Effects of dietary orotic acid on the blood cholesterol content and profile of rats. *J. Pearce & M. J. McAstocker* 24A
Effects of dietary yoghurt on cholesterol synthesis and sterol excretion in rats. *J. Pearce & M. J. McAstocker* 25A
Postprandial triacylglycerol concentration and coagulation factor VII activity. *H. M. Roche & M. J. Gibney* 26A
The effects of altered food frequency consumption on plasma lipids in free-living healthy volunteers. *S. A. McGrath & M. J. Gibney* 27A
Is monounsaturated fatty acid rich butter beneficial in the treatment of hyperlipidaemia? *S. M. Rafferty, D. Harrington, M. C. Canton, D. O'Callaghan, J. Murphy, J. F. Connolly, J. Horgan & M. J. Gibney* 28A
An investigation of eating patterns in non-ulcer dyspepsia. *P. Cuperus, P. W. N. Keeling, A. Chua & M. J. Gibney* 29A
Dietary intake and nutrition concerns in Duchenne muscular dystrophy. *G. Byrne & S. Sugrue* 30A
Basal metabolic rate and lean body mass in man. *G. J. Cuskelly & K. M. Younger* 31A
Should nutrient variables be transformed before epidemiological analyses? *H. Millns, M. Woodward & C. Bolton-Smith* 32A
Adequacy of vitamin A and vitamin C intakes in Scotland: the use of probability analyses. *H. Millns, M. Woodward & C. Bolton-Smith* 33A
A quantitative food frequency questionnaire for the assessment of dietary iron intake in Irish adolescents. *B. C. Mullin & N. P. Kennedy* 34A

1/2 December 1993

Correction of acidosis in chronic renal failure improves insulin-mediated glucose utilization but not insulin-mediated changes in protein degradation. *T. H. J. Goodship, D. Reaich & C. Scrimgeour* 36A
Nutrient-induced thermogenesis of a complete total parenteral nutrition mixture: relative contributions of glucose and amino acids. *G. L. Carlson, P. Gray, J. Arnold, R. A. Little & M. H. Irving* 37A

Dual X-ray absorptiometry measurements of fat mass: comparison with direct analysis. *Susan A. Jebb, Gail R. Goldberg, G. Jennings & M. Elia* 38A
Muscle wasting in multiple organ failure measured using ultrasound. *I. T. Campbell, S. Sukumar, T. Watt, D. Withers, R. England & D. Martin* 39A
Recovery of ^{13}C in breath from infused $NaH^{13}CO_3$ increases during euglycaemic hyperinsulinaemia due to a time-dependent effect. *T. H. J. Goodship, D. Reaich, B. Cooper, K. A. Graham & C. M. Scrimgeour* 40A
A new tracer method (the labelled bicarbonate–urea method) for estimating energy expenditure in man. *M. Elia, M. G. Jones, G. Jennings, S. D. Poppitt, N. J. Fuller, P. R. Murgatroyd & S. A. Jebb* 41A
Early endogenous mediators of the response to trauma. *G. E. Curtis, A. Walsh, L. Formela & A. Shenkin* 42A
Effect of protein malnutrition on food intake, protein distribution and acute-phase protein response in the rat. *G. Jennings & M. Elia* 43A
The effect of dietary glutamine on the structure of the gastrointestinal mucosa of rats undergoing an acute-phase response to tissue injury. *M. Wusteman, H. Tate, L. Weaver, G. Neale & M. Elia* 44A
N-acetyl cysteine, glutamine and arginine may be essential to the ability of InmunoNutril® to enhance antioxidant defences in rats challenged with endotoxin. *R. F. Grimble, S. Langley, Joanne White & Nicolette Yianni* 45A
The effect of tuberculosis and undernutrition on protein turnover and the response to nutrition. *D. C. Macallan, A. V. Kurpad, P. S. Shetty, M. A. McNurlan, P. J. Garlick & G. E. Griffin* 46A
The effect of parenteral nutrition on neutrophil adhesion molecule expression. *S. M. Plusa, R. Horsman, J. N. Primrose & N. Webster* 47A
Paediatric referrals for combined small bowel and liver transplantation: timing and indications; Room for Improvement? *S. V. Beath, P. J. McKiernan, M. S. Murphy, J. A. C. Buckels, A. D. Mayer, I. W. Booth & D. A. Kelly* 48A
Colonic secretion induced by enteral feeding in man is reversed by short-chain fatty acids. *T. E. Bowling, A. H. Raimundo, G. K. Grimble & D. B. A. Silk* 49A
The effect of the first course of chemotherapy on dietary intake and urinary urea nitrogen in acute myeloid leukaemia. *H. V. Fawcett, A. Owens, B. Coyle, J. Deeks, A. C. Newland & J. Powell-Tuck* 50A
A comparison of two types of peripheral intravenous feeding line and of the effect of heparin on line occlusion. *S. M. Plusa, R. Horsman, S. Kendall-Smith, J. N. Primrose & N. Webster* 51A
Gastric volumes and regurgitation of feed during enteral tube-feeding in severe head injury. *E. Weekes & M. Elia* 52A
Incidence of infection related to insertion sites of long lines in intensive care patients. *E. Rainford, S. T. Tan, P. M. Ford & M. Taylor* 53A
Catheter-related morbidity in patients on home parenteral nutrition. *N. Williams, G. L. Carlson, S. Wales, J. L. Shaffer & M. H. Irving* 54A
Effect of undernutrition on muscle protein synthesis at local and distant sites following surgery in the rat. *P. W. Emery & P. Sanderson* 55A
The effect of non-protein energy intake on protein metabolism kinetics in neonates receiving total parenteral nutrition. *M. O. Jones, A. Pierro, P. J. Garlick, M. A. McNurlan & D. A. Lloyd* 56A

Weight loss, interleukin 6 secretion and alpha 2-macroglobulin response in experimental colitis. *P. J. D. Neilly, G. Jennings, N. H. Anderson, M. D. McCaigue, K. R. Gardiner, S. J. Kirk, M. Elia & B. J. Rowlands* 57A
The effect of acute insulin administration on post-prandial glycogen and lipid synthesis in the rat. *J. W. Powles, O. A. Obeid & P. W. Emery* 58A
Effect of intramuscular glutamine concentrations on muscle protein synthesis estimated after injury using a constant infusion of [^{3}H] phenylalanine. *M. Wusteman, H. Tate & M. Elia* 59A
The effect of acute starvation on tissue glutathione concentrations in the rat. *S. J. Bevan* 60A
Low muscle glutamine in the critically-ill patient is poorly repleted by intravenous glutamine of 5 d duration. *T. E. A. Palmer, C. Jones & R. D. Griffiths* 61A
The use of bioimpedance to measure total body water in multiple organ failure. *K. Foley, M. A. Keegan, D. Millican, B. Murby, N. Latham & I. T. Campbell* 62A
Total energy expenditure and energy intake in Human Immunodeficiency Virus infected men. *D. C. Macallan, C. Noble, C. Baldwin, S. A. Jebb, W. A. Coward, A. M. Prentice & G. E. Griffin* 63A
Changes in energy expenditure and body composition after severe head injury. *E. Weekes & M. Elia* 64A
Validation of an activity questionnaire to assess total energy expenditure in Human Immunodeficiency Virus infection. *C. Baldwin, C. Noble, D. C. Macallan, S. A. Jebb & A. M. Prentice* 65A
Use of a three-component model for evaluation of density and hydration of fat-free mass and validation of body composition predicted from the same whole-body bio-electrical impedance measurement, in lean and obese women. *N. J. Fuller, M. B. Sawyer & M. Elia* 66A
Accuracy and precision of techniques used for measuring height in critical illness. *T. Watt, F. Dodd, M. Keegan & I. T. Campbell* 67A
Inhibition of adipose tissue lipolysis *in vivo* in man by ketone body infusion. *J. Webber & I. A. Macdonald* 68A
Differential effects of high-fat diets on adipose tissue deposition in the rat. *E. J. Sherrington, P. Yaqoob & P. C. Calder* 69A
Dietary lipid manipulation alters lymphocyte phospholipid fatty acid composition but not membrane fluidity. *P. Yaqoob, D. J. Harvey, E. A. Newsholme & P. C. Calder* 70A
A 12-week programme of brisk walking and postprandial lipaemia in previously-sedentary women aged 40–55 years. *H. E. Aldred, A. E. Hardman & S. Taylor* 71A

27 January 1994

Resting metabolic rate in rural Nepali men and women. *V. R. Tuffrey & S. S. Strickland* 73A
Energy intake in hospitalized elderly patients. *P. Marshall, M. Hogarth, G. Frost, S. Martin, F. Bartlett, C. Bulpitt, C. Nicholl & L. Lovat* 74A
A comparison of estimated *v.* measured energy expenditure in the obese. *C. MacQueen & G. Frost* 75A

Meal composition and postprandial mood and alertness: the influence of the fat and energy content of meals ingested mid-morning and at lunch time. *A. S. Wells & N. W. Read* 76A

Nutritional composition (by chemical analysis) of sweet home-prepared weaning foods for infants. 1. Energy and macronutrients. *B. J. Stordy, Alison M. Redfern & Jane B. Morgan* 77A

Influence of dietary long-chain *n*-3 fatty acids on susceptibility to oxidation of low-density lipoprotein in man. *Lucie Pollard, Francesca Oakley & T. A. B. Sanders* 78A

Increased factor VII coagulant activity following the consumption of a high-fat meal in healthy subjects. *Tamara de Grassi, G. J. Miller & T. A. B. Sanders* 79A

Gastrointestinal flora do not contribute to increased ethane production on feeding fish oils. *B. J. P. Quartley, C. M. Williams, M. N. Clifford & R. Walker* 80A

The effect of postprandial lipaemia on platelet aggregation. *C. Hallett, S. M. O. Hourani & C. M. Williams* 81A

Meal fat content and postprandial lipaemia: apo B48 and retinyl palmitate as markers of chylomicron particles. *S. G. Isherwood, S. Sethi, B. J. Gould, R. J. Howland & C. M. Williams* 82A

The effect of prolonged exercise on selected brain monoamine concentrations in the rat. *W. Wilson, C. A. Marsden & R. J. Maughan* 83A

The influence of oral creatine supplement on metabolism during sub-maximal incremental treadmill exercise. *A. L. Green, P. L. Greenhaff, I. A. Macdonald, D. Bell, D. Holliman & M. A. Stroud* 84A

7/8 April 1994

Seasonal variation in the thermoregulation of the Pygmy shrew, *Sorex minutus*: can true resting metabolic rate be measured in post-absorptive shrews? *R. M. McDevitt & J. F. Andrews* 86A

Long photophase is not a sufficient stimulus to reduce thermogenic capacity in winter-acclimatized short-tailed field voles (*Microtus agrestis*) during long-term cold acclimation. *J. R. Speakman & R. M. McDevitt* 87A

Reproductive condition and food intake of Soay sheep born on a 6-month photoperiod when exposed to continuous 12 h light:12 h dark illumination. *R. N. B. Kay* 88A

Seasonality of mortality: variation by disease category, age, latitude and national economic status. *A. S. Douglas* 89A

Lipoprotein lipase and insulin-sensitive glucose transporter (GLUT4) gene expression in tissues of lean and obese (*ob/ob*) mice exposed acutely to cold. *A. Nestor & P. Trayhurn* 90A

Cellular antioxidant defence systems in smokers compared with non-smokers: effect of vitamin E supplementation. *K. M. Brown, P. C. Morrice, G. G. Duthie & J. R. Arthur* 91A

Amylase-rich flour improves the digestibility of cereal-based weaning foods. *L. T. Weaver, B. Dibba, B. Sonko, T. D. Bohane & S. Hoare* 92A

Comparison of adult and neonatal fermentation of simple and complex carbohydrate. *A. M. Parrett, C. A. Edwards & E. Lokerse* 93A

Digestion in potoroine marsupials: forestomach fermenters or metabolic generalists? *I. R. Wallis* 94A
Changes in body composition and basal metabolism in physically active elderly men: a longitudinal study. *L. A. Murray, J. J. Reilly, M. Choudhry & J. V. G. A. Durnin* 95A
Fruit and vegetable consumption of 10–11 year old children in Tayside. *Wendy L. Wrieden* 96A
Dietary intakes of female lone parents in London: energy and micronutrients. *C. Calvert, C. Rushton & E. A. Dowler* 97A
Dietary vitamin K (phylloquinone) intake in Scottish men. *S. Fenton, C. Bolton-Smith, D. Harrington & M. J. Shearer* 98A
Fruit and vegetable intake in the West of Scotland. *A. S. Anderson, K. Hunt & G. Ford* 99A
Longitudinal changes in the snack food choices of teenagers living in the West of Scotland. *A. S. Anderson, H. Sweeting & P. West* 100A
Water turnover rates in sedentary and active middle-aged men. *J. B. Leiper, A. Carnie & R. J. Maughan* 101A
Body composition estimation when height is unavailable. *T. S. Han & M. E. J. Lean* 102A
Measuring the body composition of elderly subjects: a comparison of methods. *J. J. Reilly, L. A. Murray, J. Wilson & J. V. G. A. Durnin* 103A
Weaning practice in Glasgow. *S. A. H. Savage, J. J. Reilly, C. A. Edwards & J. V. G. A. Durnin* 104A
Resistant starch in young children. *K. Verity & C. A. Edwards* 105A
Selenoprotein gene expression in the thyroid. *G. Bermano, F. Nicol, J. A. Dyer, R. A. Sunde, J. E. Hesketh & J. R. Arthur* 106A
Selenoenzyme activity in the brain stem. *J. H. Mitchell, F. Nicol, G. J. Beckett & J. R. Arthur* 107A
The effect of excessive amounts of branched-chain amino acids on amino acid utilization in growing pigs. *S. Langer & M. F. Fuller* 108A
Role of coprophagy in the utilization of microbial lysine by rats. *D. Torrallardona, C. I. Harris, E. Milne & M. F. Fuller* 109A
Variation in probable individual feed intake of lactating cows at grass given calcined magnesite-containing feed as either nuts or cobs. *Elizabeth McEleney & R. G. Hemingway* 110A
Mercury–zinc interactions in the marginally zinc-deficient rat. *J. Price, J. H. Beattie, I. Bremner, M. Gabryszuk & S. G. Wood* 111A
A simplified approach to measuring mRNA on Northern blots using chemiluminescence-based detection with digoxigenin end-labelled oligonucleotides. *P. Trayhurn, J. S. Duncan, M. E. A. Thomas, A. Nestor & D. V. Rayner* 112A
Non-enzymic glycosylation of haemoglobin in genetically obese (*ob/ob*), heterozygous (*ob/+*) and normal mice. *J. L. Morton, D. A. Peiris, D. Gunasekera & B. Winton* 113A
Determination of the effect of dietary polyunsaturated fatty acid on the content of the triacylglycerol molecular species in pig backfat. *C. O. Leskanich, R. C. Noble & C. A. Morgan* 114A

22–24 June 1994

Long-term follow-up of coeliac disease in children. *M. Ardiff, M. Hurley & S. Sugrue* 116A
Dietary compliance in adults with coeliac disease. *N. M. Codd, M. Goggins & N. P. Kennedy* 117A
Nutritional status and comparison of prescribed *v.* actual nutritional intakes of nasogastrically fed neurosurgical patients. *M. Doherty, M. Hayes & M. Moloney* 118A
A survey of nutrition interest among general practitioners. *B. L. Mallon & N. P. Kennedy* 119A
Qualitative research by focus group discussions to identify concerns about weight among adult females. *M. Kearney & M. J. Gibney* 120A
An evaluation of a method for comparison of 'healthiness' of menus in work-place restaurants. *A. Wise, D. Balfour & R. Moody* 121A
Children's perception of their body size and some reasons for their snackfood choices. *M. Gallagher & M. A. T. Flynn* 122A
Anthropometry, nutritional knowledge, and nutrient intakes in a group of Irish adults with essential hypertension. *M. A. T. Flynn, M. A. McGrath & D. D. Sugrue* 123A
The effect of very-low-, moderate- and high-fat snacks on postprandial reverse cholesterol transport in healthy volunteers. *L. O'Flaherty & M. J. Gibney* 124A
Evaluation of the antidiabetic effects of an edible mushroom (*Agaricus campestris*). *A. M. Gray & P. R. Flatt* 125A
The effect of dietary fibres and phytate on calcium absorption in the rat. *M. Harrington, A. Flynn & P. A. Morrissey* 126A
Cholesterol supplementation and tissue antioxidant enzyme activities in male and female hamsters. *N. C. Armstrong, J. M. Allen & J. J. Strain* 127A
Feeding trial, composition, oxidative stability and sensory evaluation of cultured turbot fed three commercial feeds. *E. M. Sheehan, P. J. A. Sheehy & R. Fitzgerald* 128A
Development and evaluation of a computer-based food atlas for portion size estimation. *F. Horan, G. McDermott & N. P. Kennedy* 129A
Dietary fish-oil supplementation inhibits the expression of major histo-compatibility complex (MHC) class II molecules and adhesion molecules on human monocytes. *D. A. Hughes, Z. Piper, A. C. Pinder & E. K. Lund* 130A
Effect of copper deficiency on cytokine activities in mice. *H. Jin, B. M. Hannigan & J. J. Strain* 131A
Total reflection X-ray fluorescence: a sensitive multi-element technique for the analysis of nutritional and toxic elements. *Peter H. Evans, Stephen J. Haswell, David Barclay & Christopher J. Bates* 132A
An assessment of ultrafiltratable iron using a continuous flow *in vitro* method. *A. M. Minihane & S. J. Fairweather-Tait* 133A
High-performance liquid chromatographic determination of plasma pyridoxal-5-phosphate by use of the cyanide derivative. *A. L. Bailey, S. Southon, A. J. A. Wright, P. M. Finglas & S. Maisey* 134A
Factors influencing the determination of folate in foods. *C. A. Martin, L. O'Mahoney & P. J. A. Sheehy* 135A

Supplies of antioxidant nutrients across western Europe are strongly and inversely related to heart disease (CHD) death rates. *M. C. Bellizzi, M. F. Franklyn, G. G. Duthie & W. P. T. James* 136A

Plasma retinol, α-tocopherol and carotenoids in the cystic fibrosis population at Cork Regional Hospital. *C. O'Sullivan Corbett, C. Shortt, A. M. Fanning, P. J. A. Sheehy, J. B. Watson & P. A. Morrissey* 137A

The correlation between intake of lutein, lycopene and β-carotene from vegetables and fruits and concentrations in blood plasma. *K. J. Scott, D. I. Thurnham, D. J. Hart & S. Bingham* 138A

Antioxidant activity of astaxanthin in chicken embryo fibroblasts. *S. M. Lawlor & N. M. O'Brien* 139A

DNA damage in cultured human T-lymphocytic cells as detected by the 'comet assay': effect of increased cellular β-carotene and α-tocopherol. *S. B. Astley, A. C. Pinder & S. Southon* 140A

UVA-light-induced oxidative stress: an investigation of potentially protective dietary constituents in an *in vitro* cell culture model system. *I. O'Connor & N. M. O'Brien* 141A

Children with a high milk consumption are more likely to have micronutrient intakes which meet reference nutrient intakes. *C. H. S. Ruxton, T. R. Kirk, N. R. Belton & M. A. M. Holmes* 142A

The effect of fortification on daily micronutrient intakes of breakfast cereal consumers in Great Britain. *H. McNulty, J. Eaton-Evans, G. Woulahan & J. J. Strain* 143A

Seasonal fluctuations in vitamin A status and health indicators in Gambian infants. *C. A. Northrop-Clewes, P. G. Lunn & R. M. Downes* 144A

Plasma, platelet and erythrocyte α-tocopherol concentrations as static measures of vitamin E status in rats. *G. A. Lynam, P. J. A. Sheehy & P. A. Morrissey* 145A

Relationships between adipose tissue and plasma antioxidant nutrients in Scottish men. *S. McGrath, S. Hirrel, D. I. Thurnham, K. Carruthers & R. A. Riemersma* 146A

Stability of fat-soluble vitamins in whole blood. *U. J. McLoone, L. M. Edmond, S. Oakes, C. Greenwood & D. I. Thurnham* 147A

EC-FLAIR 'reference assays' for whole-blood glutathione peroxidase (GSH-Px) and erythrocyte superoxide dismutase (SOD): results of an inter-laboratory trial. *J. L. Belsten & A. J. A. Wright* 148A

Riboflavin depletion enhances the transit of enterocytes along the villi. *E. A. Williams, R. D. E. Rumsey & H. J. Powers* 149A

Influence of dietary long-chain *n*-3 fatty acids with and without additional vitamin E on aortic fatty streak formation. *Lucie Pollard & T. A. B. Sanders* 150A

Increased postprandial lipaemia with a diet rich in oleic acid is decreased by *n*-3 fatty acids in healthy young men. *Francesca Oakley, T. A. B. Sanders, D. Crook, M. F. Oliver & G. J. Miller* 151A

The effect of low dose fish-oil supplementation on cytokines and leucocyte function in healthy female volunteers. *J. M. W. Wallace, E. Turley, W. S. Gilmore & J. J. Strain* 152A

Eicosapentaenoic acid inhibits the expression of major histocompatibility complex (MHC) class II molecules and adhesion molecules on human monocytes *in vitro*. *D. A. Hughes, A. C. Pinder & S. Southon* 153A
A comparison of iron supplementation with dietary counselling in the prevention of iron deficiency anaemia during pregnancy. *E. A. Cahill, S. F. Daly, P. M. Mathias & M. J. Turner* 154A
Milk feeding practices during the first year of life and their relationship to iron status at age 12 months. *V. E. Freeman, H. M. V. Hoey & M. J. Gibney* 155A
The predictive value of plasma antioxidant activity at birth for morbidity and mortality of premature babies. *K. M. Silvers, A. T. Gibson & H. J. Powers* 156A
Effect of oral iodized poppyseed oil during pregnancy on maternal and infant thyroid hormones and iodine status. *S. Filteau, K. Sullivan, Z. Anwar, U. Anwar & A. Tomkins* 157A

2–5 August 1994

Body composition, resting energy expenditure and fitness in female professional and student contemporary dancers. *M. Khalouha, M. Cox, N. Gibson, Y. Koutedakis & P. J. Pacy* 159A
Factors predicting weight loss during the first 4 weeks of treatment in obese adults on three weight-reducing diets. *C. J. Watts, C. D. Summerbell & J. S. Garrow* 160A
Estimation of body composition in children using skinfold thickness: a cross-validation study. *J. J. Reilly, J. Wilson & J. V. G. A. Durnin* 161A
The effect of dietary energy density on energy intake, weight gain and change in subcutaneous fat depots in 7-month-old infants. *K. F. Michaelsen* 162A
The effects of exercise on postprandial lipaemia: apoliproprotein B-48 and retinyl palmitate as markers of chylomicron particles. *S. G. Isherwood, S. Sethi, B. J. Gould & C. M. Williams* 163A
Olive oil and postprantial lipaemia: a study on the effects of meals of different olive-oil content on postprandial plasma-lipid levels in healthy men. *A. Zampelas, C. C. Culverwell, J. M. E. Knapper, K. Jackson, B. J. Gould, J. Wright & C. M. Williams* 164A
The effects of starvation and the insulin/glucose clamp on plasma fatty acid turnover and oxidation. *J. Webber, J. Taylor, H. Greathead, J. Dawson, P. Buttery & I. A. Macdonald* 165A
The intra- and inter-individual variability in the gastrointestinal handling of [1-^{13}C]palmitic acid in healthy adults. *J. L. Murphy, A. E. Jones, A. Hounslow, S. Brookes, M. Griffiths & S. A. Wootton* 166A
Effect of monounsaturated fatty-acid-enriched test meals on plasma insulin and GIP concentrations. *J. M. E. Knapper, N. Furlonger, C. C. Culverwell, A. Zampelas, K. Jackson, L. M. Morgan, J. A. Tredger & C. M. Williams* 167A
Dietary cholesterol may modify the modulatory effects of dietary fats on the metabolic responses to endotoxin in rats. *H. T. Besler & R. F. Grimble* 168A
Dietary lipids modulate systolic blood pressure in the rat. *A. G. Clamp, S. C. Langley, R. F. Grimble & A. A. Jackson* 169A

The role of dietary protein restriction during pregnancy on the activity of placental 11β-hydroxysteroid dehydrogenase. *G. J. Phillips, S. C. Langley-Evans, R. Benediktsson, J. R. Seckl, C. R. W. Edwards & A. A. Jackson* 170A

In utero exposure to maternal low protein diets induces hypertension in weanling rats, independently of maternal blood pressure changes. *S. C. Langley-Evans, G. J. Phillips & A. A. Jackson* 171A

Sexual dimorphism of macronutrient selection and regional adipose tissue accumulation following *in utero* exposure to maternal low-protein diet. *H. D. McCarthy, C. Pickard, J. Speed & A. A. Jackson* 172A

Glucose tolerance in rats exposed to maternal low-protein diets *in utero*. *R. F. Browne, S. C. Langley-Evans & A. A. Jackson* 173A

Energy expenditure and substrate metabolism after carbohydrate ingestion in relation to fetal growth in women born in Preston. *S. A. Wootton, J. L. Murphy, F. Wilson & D. Phillips* 174A

Fetal growth retardation and insulin resistance induced by a low-protein diet during pregnancy. *M. J. Holness & M. C. Sugden* 175A

Micronutrients and fetal growth retardation in Brazil. *P. Rondo, R. Abbott, L. Rodrigues & A. M. Tomkins* 176A

Influence of early diet in full-term babies on their subsequent cognitive performance during adolescence. *L. C. Greene, A. Lucas, M. B. E. Livingstone & P. S. E. G. Harland* 177A

Acute interleukin-1β administration induces anorexia and increases regional hypothalamic neuropeptide Y concentrations in the meal-fed rat. *H. D. McCarthy, S. Dryden & G. Williams* 178A

Modulatory effects of butter and maize oil on the response of cholesterol metabolism in liver and serum to endotoxin in rats. *H. T. Besler, P. S. Tappia & R. F. Grimble* 179A

Fatty acids modulate the affinity of tumour necrosis factor-α (TNFα) receptors in cultured rat hepatocytes. *A. G. Clamp & R. F. Grimble* 180A

Effects of endotoxin on liver plasma membrane phospholipid class distribution in rats fed on maize and olive oils and butter. *H. T. Besler & R. F. Grimble* 181A

Prenatal nutritional adequacy and gender influence the ability of adult rats to produce interleukins 1 and 6 and tumour necrosis factor α. *P. S. Tappia, H. D. McCarthy, S. C. Langley-Evans, A. A. Jackson & R. F. Grimble* 182A

Endotoxin-induced production of interleukin-6 (IL-6) is enhanced by vitamin E deficiency and reduced by dietary polyphenols. *A. M. T. Amarakoon, P. S. Tappia & R. F. Grimble* 183A

The effect of fatty acids on the inflammatory response to cytokines by cultured rat hepatocytes. *A. G. Clamp & R. F. Grimble* 184A

Calprotectin in cystic fibrosis: a sensitive marker of the acute-phase response to infection. *P. A. Clohessy, M. K. Fagerhol, J. Friend, D. Goudie, P. J. Helms, M. Omran, G. Russell & B. E. Golden* 185A

The effect of dietary lipid manipulation on lymphocyte cell surface molecule expression. *P. Sanderson, P. Yaqoob & P. C. Calder* 186A

The effect of dietary lipid manipulation on leucocyte proliferation in rat whole blood. *P. Yaqoob, E. A. Newsholme & P. C. Calder* 187A

The effect of dietary fatty acids on lipoprotein composition in the rat. *N. M. Jeffery, P. Yaqoob, P. C. Calder, D. Wiggins, G. F. Gibbons & E. A. Newsholme* 188A
Dietary lipid manipulation influences phospholipid class distribution in the rat hepatocyte plasma membrane. *A. G. Clamp & R. F. Grimble* 189A
Hepatic phosphatidylcholine biosynthesis in the rat: effects of pregnancy. *G. C. Burdge & A. D. Postle* 190A
Pregnancy-associated adaptations to maternal hepatic and plasma phosphatidylcholine molecular species composition. *G. C. Burdge & A. D. Postle* 191A
The effects of adrenaline on fatty acid turnover and oxidation in lean and obese subjects. *J. Webber, J. Taylor, H. Greathead, J. Dawson, P. Buttery & I. A. Macdonald* 192A
Impaired postprandial clearance of triacylglycerol-rich lipoproteins in adipose tissue in obesity. *J. L. Potts, K. N. Frayn, S. M. Humphreys, S. W. Coppack & R. M. Fisher* 193A
Determinants of carotenoid antioxidant activity in model membranes. *A. A. Woodall, G. Britton & M. J. Jackson* 194A
Total antioxidant capacity and lipid peroxidation in newly diagnosed patients with non-insulin dependent (type II) diabetes. *H. F. Goode, S. G. Gilbey, N. R. Webster & B. E. Walker* 195A
Urea-appearance: critical determinant of urea-nitrogen salvage on low-protein diet. *T. S. Meakins & A. A. Jackson* 196A
The effect of amino acids upon the pathways of $^{15}NH_4Cl$ conversion to urea in isolated sheep hepatocytes. *Q. J. Luo, S. A. Maltby, G. E. Lobley, M. A. Lomax & A. G. Calder* 197A
The effects of potassium exclusion on resting energy expenditure and kidney protein synthesis in young rats. *R. D. Hailwood & S. A. Wootton* 198A
Selection of dietary tryptophan concentration by growing pigs. *R. A. C. Fairley, S. P. Rose & M. F. Fuller* 199A
Incorporation of ^{15}N-ammonia into urea and amino acids as influenced by fasting and feeding in man. *P. J. M. Weijs, A. G. Calder & G. E. Lobley* 200A
Postprandial utilization of wheat protein in normal adults. *A. Fereday, N. Gibson, M. Cox, D. Halliday, P. J. Pacy & D. J. Millward* 201A
Postprandial protein utilization in the elderly. *A. Fereday, N. Gibson, M. Cox, D. Halliday, P. J. Pacy & D. J. Millward* 202A
Double-blind pilot trial, in elderly women with fractured femur, of ornithine α-ketoglutarate *v.* a defined formula peptide oral supplement. *N. Bean, J. Redden, H. Goode, G. Grimble & S. P. Allison* 203A
Antioxidants in diabetes. *N. R. Williams, J. Rajput-Williams, S. V. Nigdikar, J. A. West, S. McGrath, J. Foote, B. Henderson, A. N. Howard & D. I. Thurnham* 204A
A randomized clinical trial of parenteral selenium supplementation in preterm infants. *L. A. Daniels, R. A. Gibson & K. Simmer* 205A
Response of selenium content of chicken flesh to increased selenium in feed. *M. N. I. Barclay & A. MacPherson* 206A
Effect of low-dose fish-oil supplementation with or without added vitamin E on plasma vitamins. *E. Turley, J. M. W. Wallace, W. S. Gilmore & J. J. Strain* 207A

High plasma vitamin C in premature babies may inhibit the antioxidant activity of caeruloplasmin. *A. Loban, K. M. Silvers, A. T. Gibson & H. J. Powers* 208A
Riboflavin depletion at weaning is associated with a failure to reach normal villus number in the rat duodenum. *E. A. Williams, H. J. Powers & R. D. E. Rumsey* 209A
The effects of copper deficiency in male Syrian hamsters fed on diets containing either maize or fish oil. *N. C. Armstrong, J. M. Allen & J. J. Strain* 210A
Size-related artifacts may lead to spurious relationships between calcium intake and bone mineral density measured by absorptiometry. *A. Prentice, T. J. Parsons & T. J. Cole* 211A
Ontogenic changes in peri-renal brown adipose tissue of newborn lambs. *J. A. Bird, L. Clarke, M. A. Lomax & M. E. Symonds* 212A
Effect of fetal thyroidectomy on thermoregulation in newborn lambs. *S. J. Lyke, J. A. Bird, M. A. Lomax, D. A. L. Shepherd & M. E. Symonds* 213A
Effects of nutrition and thyroxine administration on perirenal adipose tissue development in hand-reared postnatal lambs. *J. J. Gate, J. A. Bird, M. J. Bryant, L. Clarke, M. A. Lomax & M. E. Symonds* 214A
Effects of supplementary protein in the dry period on milk production in the subsequent lactation. *J. M. Moorby, R. J. Dewhurst & S. Marsden* 215A
Energy intake in the follicular and luteal phases of the menstrual cycle in Mexican women. *S. A. Bonner, C. P. Sanchez-Castillo, M. A. De L. Solano, N. Lopez, L. Davidson & G. McNeill* 216A
Thermic effect of continuous feeding in young and elderly healthy adults. *N. Gibson, A. Fereday, M. Cox, D. J. Millward & P. J. Pacy* 217A
Effects of diet composition on 24 h energy expenditure during energy restriction. *J. M. Whitehead, G. McNeill & J. S. Smith* 218A
Changes in energy and macronutrient intakes after smoking cessation. *R. L. Thompson, E. A. Scott, B. M. Margetts & D. A. Wood* 219A
Influence of short-term cessation of endurance training on postprandial lipaemia in man. *N. D. Nelson, N. V. Tsetsonis & A. E. Hardman* 220A
The postprandial response to high-fat, low-carbohydrate and low-fat, high-carbohydrate meals providing the same amounts of energy in subjects at risk of heart disease. *D. L. Frape, N. R. Williams, J. Pickersgill, R. Murrills, C. Palmer & R. J. Fletcher* 221A
Measurement of gross body fat of rats using dual energy X-ray absorptiometry. *Susan A. Jebb, S. W. Garland, G. Jennings & M. Elia* 222A
The effect of an elemental diet on stool output in irritable bowel syndrome. *A. J. Costello, J. L. Murphy, S. A. Wootton, J. T. Rucker, G. A. Kirby & J. O. Hunter* 223A
The effect of the addition of raw potato starch to habitual diet on stool output. *A. J. Costello & S. A. Wootton* 224A
Excretion of ^{13}C within stool and breath following oral and intravenous administration of ^{13}C-labelled sodium bicarbonate. *A. E. Jones, J. L. Murphy & S. A. Wootton* 225A
Increasing luminal viscosity stimulates crypt-cell proliferation throughout the gut. *M. E. Lynn, J. C. Mathers & D. S. Parker* 226A

Guar-gum feeding reduces *Lactobacillus fermentum* adherence to enterocytes. *M. E. Lynn, J. C. Mathers & D. S. Parker* 227A
GIP and GLP-1(7-36)amide secretion in response to intraduodenal nutrient infusions in pigs. *J. M. E. Knapper, L. M. Morgan, J. M. Fletcher & V. Marks* 228A
Role of the renin-angiotensin system in the maintenance of maternal-diet-induced hypertension in the rat. *S. C. Langley-Evans, J. J. Morton & A. A. Jackson* 229A
Hormonal effects of lignans in a group of men. *R. Hughes, A. Cassidy & S. Bingham* 230A
Calibration of a food frequency questionnaire to estimate food intake in relation to artificial sweetener consumption. *P. J. Halford, H. Warwick & B. Margetts* 231A
Dietary fat: grams or percentage of energy? Analysis of the Dietary and Nutritional Survey of British Adults and the Leeds High Fat Study. *J. I. Macdiarmid, J. E. Cade & J. E. Blundell* 232A
Estimation of food portion size using household measures and food photographs: a comparison. *P. J. Robson, M. B. E. Livingstone & P. G. McKenna* 233A
Collection of food intakes, food composition and food portion sizes in Central Cameroon, West Africa, to develop a food frequency questionnaire in rural and urban population samples, as part of an International comparative study. *S. Sharma, J. C. Mbanya, J. E. Cade, S. Gwangwa'a & J. K. Cruickshank* 234A
Who are the 'low energy reporters' in the Dietary and Nutritional Survey of British Adults? *J. A. Pryer, M. Vrijheid, R. Nichols & P. Elliott* 235A
Who complies with dietary recommendations for the prevention of CHD and what do they eat? Findings from the Dietary and Nutritional Survey of British Adults. *J. A. Pryer, E. Brunner, P. Elliott, R. Nichols, H. Dimond & M. Marmot* 236A
The effect of meals of varying fat and carbohydrate content on an electrophysiological measurement of sleepiness. *A. S. Wells, N. W. Read, J. Jones & C. Idzikowski* 237A
Mothers' perceptions of food for their children. *M. M. Raats, R. Shepherd & P. Sparks* 238A
Acute effects of breakfasts of differing fat and carbohydrate content on morning mood and cognitive performance. *H. M. Lloyd & P. J. Rogers* 239A
Does short-term food deprivation affect cognitive function? *M. W. Green, N. A. Elliman & P. J. Rogers* 240A
Established behaviour influences public perception of nutrition education messages. *A. Wise, L. Farmer & A. McLeish* 241A
Type of message construction affects public perception. *L. Farmer, A. Wise & A. McLeish* 242A
Interpretation of abnormal biochemical indicators of nutritional status during malaria infection. *B. S. Das, D. I. Thurnham & D. B. Das* 243A
The effects of heat exposure on sodium balance at three levels of dietary sodium intake. *A. J. Allsopp, S. A. Wootton & R. Sutherland* 244A
The relationship between dietary iodine intake during pregnancy and birth outcome. *S. Pruenglampoo, P. Leelapat, S. Nimsakul, A. Tansuhaj, S. Sethawanit, S. Rugpao, P. Chiowanich, B. M. Margetts & A. A. Jackson* 245A

Cation pumps in skeletal muscle undergo dramatic up-regulation in the perinatal period. *A. P. Harrison, T. Clausen & M. J. Dauncey* 246A
Zinc-reversible candidastatic activity of leucocyte protein, calprotectin. *P. A. Clohessy, M. K. Fagerhol, P. J. Helms, H. Mackenzie & B. E. Golden* 247A
The effect of supplementation with groundnut (*Arachis hypogaea*) and/or milk on the viscosity and energy density of maize porridges as weaning foods in developing countries. *J. K. Kikafunda & A. F. Walker* 248A
Nutritional composition (by chemical analysis) of sweet home-prepared weaning foods for infants. 2. Sugars. *Alison M. Redfern, Jane B. Morgan & B. J. Stordy* 249A
Nutritional composition (by chemical analysis) of sweet home-prepared weaning foods for infants. 3. Sodium, zinc, iron, iodine. *B. J. Stordy, Alison M. Redfern & Jane B. Morgan* 250A
The contribution of breakfast to daily micronutrient intakes of adults in Great Britain. *H. McNulty, J. Eaton-Evans, G. Woulahan & J. J. Strain* 251A
A comparison of two techniques to find out whether 5 to 8-year-olds in deprived schools in Southampton skip breakfast. *Jacqueline Landman & Val Box* 252A
Few differences in mean daily intake associated with a high intake of snacks in school children. *C. H. S. Ruxton, T. R. Kirk, N. R. Belton & M. A. M. Holmes* 253A
Determination of energy intake in 7–10 year old children: use of food record and interview technique. *P. J. Moynihan, T. J. Butler & A. J. Rugg-Gunn* 254A
The influence of social privilege on food and nutrient intakes in adolescent females. *J. Cadogan, C. Hyland, N. Jones & M. Barker* 255A
The relationship between urinary iodine excretion in 24 h urine collection and casual urine samples in Thai pregnant women. *S. Pruenglampoo, P. Leelapat, T. Vongchak, V. Likit-Ekaraj, S. Woranuj & T. Kumrin* 256A
Vitamin B_{12} deficiency in rural Mexicans. *L. H. Allen, J. E. Casterline, J. L. Rosado & P. Lopez* 257A
Calcium requirements of lactating women: effect of a calcium supplement on the breast-milk calcium concentration of rural Gambian women. *A. Prentice, L. M. A. Jarjou, B. Dibba, Y. Sawo, T. J. Cole, D. M. Stirling & S. Fairweather-Tait* 258A
Dietary sources of calcium and the contribution of flour fortification to total calcium intake. *A. J. Adamson, P. J. Moynihan, A. J. Rugg-Gunn, D. R. Appleton & T. J. Butler* 259A
Influence of diet on summertime bone mineral density in healthy pre-menopausal women. *S. A. New, C. Bolton-Smith, D. A. Grubb & D. M. Reid* 260A
Plasma antioxidant nutrients in Belfast and Toulouse. *D. I. Thurnham, N. R. Williams, A. E. Evans, J. P. Cambou & A. N. Howard* 261A
Plasma selenium concentration of the Scottish population in decline. *A. MacPherson, R. Scott, M. N. I. Barclay & J. Dixon* 262A
Selenium status in term and preterm infants. *L. A. Daniels, R. A. Gibson & K. Simmer* 263A
Influence of iron supplementation on markers of infection in Pakistani infants. *C. A. Northrop-Clewes, U. J. McLoone, P. I. Paracha & D. I. Thurnham* 264A

The exclusion of folic-acid-fortified foods significantly reduces folate status. *G. J. Cuskelly, H. McNulty, F. McCullough & J. M. Scott* 265A
Surviving in Sarajevo: winter nutrition monitoring 1993–1994. *F. Watson, J. Vespa & I. Kulenovic* 266A
